

Product description

Volume dosing of low to high viscosity media via a Eccentric screw.

Material-friendly conveying with a volume accuracy of approx. 1%. (Depending on material)

Suitable for dosing UV material, silicones, adhesives, greases but also abrasive media.

Parts in contact with the medium: HD-POM, stainless steel

Technical description

- Drive via gear motor
- Delivery rate 1.1 ml / rev.
- Dosing speed: 0.1 - 1.1 ml / s
- Dosing volume min.: 0.3 ml
- Material inlet 1/2 "
- Material outlet Luer Lock or 1/8 "
- Weight: approx. 3 kg
- Max. Viscosity: 120.000 mPas
- Dimensions: approx. 380 x 80 x 80 mm

Options:

4480 Controller

4473 Foot-switch
